Circlip Pliers

Category: **Hand Tools - Fastening & Gripping** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Circlip pliers

What it is used for

Circlip pliers install or remove retaining rings from shafts or bores. Use the correct plier type and size to prevent ring damage or sudden release.

How to use

1. Identify whether the circlip is internal or external and select matching pliers.
2. Inspect the tips, handles, and spring mechanism for damage.
3. Secure the workpiece and wear eye protection before handling the circlip.
4. Fit the plier tips fully into the circlip holes.
5. Squeeze or spread the handles gradually to compress or expand the ring.
6. Position or remove the ring carefully without overstretching it.
7. Release the pliers slowly and verify that the ring is seated correctly.

⚠ Safety

- Wear eye protection because circlips can spring free unexpectedly.
- Keep the ring pointed away from your face and other people.
- Do not use pliers with damaged tips or an incompatible size.
- Never exceed the tool's intended opening range.

Care & storage

- Wipe the pliers clean, check the spring and tips, and store them dry.
