Computer Keyboard

Category: **Computers, IT & Office** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Key Boards

What it is used for

A computer keyboard is used to enter text, numbers, and commands into a computer. Use the correct keys and keep the keyboard clean for reliable operation.

How to use

1. Place the keyboard on a stable, comfortable surface.
2. Connect the USB cable or pair the wireless keyboard according to its instructions.
3. Check that the keyboard is recognized by the computer.
4. Type a short test message and verify that the keys respond correctly.
5. Use the appropriate function keys and shortcuts for the required task.
6. Disconnect the keyboard safely before cleaning or moving a wired setup.
7. Wipe the keyboard gently after use and keep it free from debris.

⚠ Safety

- Keep liquids and wet hands away from the keyboard.
- Do not force stuck keys or pull the cable sharply.
- Keep cables arranged to prevent tripping and connector damage.

Care & storage

- Clean with a soft, dry cloth and follow the manufacturer's cleaning instructions.
