Cono Weeder

Category: **Agriculture & Gardening** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Cono weeder

What it is used for

A cono weeder removes weeds between rows of transplanted rice or similar crops while helping disturb the soil surface. Use it in suitable field conditions and follow safe operating technique.

How to use

1. Inspect the frame, rollers, handles, and moving parts for damage.
2. Wear suitable footwear and protective clothing before entering the field.
3. Check crop spacing and soil conditions to confirm the tool is suitable.
4. Hold both handles firmly and align the rollers between crop rows.
5. Push and pull the cono weeder steadily along the row without striking plants.
6. Lift the tool carefully when turning at the end of a row.
7. Remove trapped weeds and soil after stopping the tool.

⚠ Safety

- Keep feet and hands away from rollers and moving parts.
- Do not use the tool in unsuitable soil or crowded conditions that risk crop damage.
- Avoid working in deep water or unstable ground without appropriate precautions.
- Carry the tool with its working parts directed away from others.

Care & storage

- Wash off soil, dry the tool, and inspect handles and rollers after use.
