Drain Auger

Category: **Plumbing & Pipe Fitting** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Sink auger

What it is used for

A drain auger clears blockages in sink and drain pipes using a flexible cable or coil. Use it carefully to remove obstructions without damaging the pipe or fixture.

How to use

1. Inspect the auger cable, handle, drum, and tip for damage or sharp defects.
2. Wear gloves and eye protection and clear the area around the drain.
3. Remove the drain cover or strainer if required by the tool instructions.
4. Feed the cable slowly into the drain while turning the handle as directed.
5. Advance gently until resistance indicates a blockage; do not force the cable.
6. Retract the cable slowly and remove trapped debris safely.
7. Flush the drain with suitable water flow and clean the tool after use.

⚠ Safety

- Do not use an auger in a drain containing hazardous chemical cleaner.
- Keep hands clear of the rotating cable and wear suitable protective gloves.
- Do not force the cable against fragile pipes or fittings.
- Stop if the cable jams or the pipe appears damaged.

Care & storage

- Remove debris, clean and dry the cable, and inspect it before storage.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
