Drum Seeder

Category: **Agriculture & Gardening** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Paddy drum seeder

What it is used for

A paddy drum seeder places pre-germinated rice seeds in rows to support uniform sowing. Prepare the field and operate the seeder at a steady pace for consistent spacing.

How to use

1. Inspect the drum, seed outlets, frame, handles, and wheels for damage.
2. Prepare a level, puddled field with suitable moisture and surface conditions.
3. Select clean, pre-germinated paddy seeds according to the recommended procedure.
4. Fill each drum compartment evenly without overloading it.
5. Align the seeder with the field rows and push it steadily forward.
6. Monitor seed flow and row spacing, stopping to clear any blocked outlets.
7. Clean the seeder and remove remaining seeds after completing the field.

⚠ Safety

- Wear suitable footwear and avoid unstable or excessively deep mud.
- Keep fingers away from moving wheels and seed outlets during operation.
- Do not force blocked outlets while the seeder is moving.
- Follow local guidance for seed treatment and field hygiene.

Care & storage

- Wash off mud, dry the equipment, and inspect the seed outlets before storage.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
