Emergency Light

Category: **Safety & PPE** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Emergency Flood Lights

What it is used for

An emergency light provides illumination during a power outage or emergency. Check its charging, battery condition, and automatic or manual operation regularly.

How to use

1. Inspect the light, casing, cable, plug, and mounting bracket for damage.
2. Charge the unit according to the manufacturer's instructions.
3. Check the charge indicator and confirm the battery is ready for use.
4. Test the light using its approved test switch or simulated power failure procedure.
5. Verify that the light illuminates and remains stable during the test.
6. Return the unit to its designated location and keep access unobstructed.
7. Record the test result and report any battery or lighting fault.

⚠ Safety

- Do not use damaged cables, plugs, or swollen batteries.
- Keep the unit away from water unless it is rated for wet conditions.
- Do not open the battery compartment or electrical housing unless authorized.
- Keep emergency lights and exit routes clear of stored items.

Care & storage

- Clean the housing and perform periodic battery and functional checks as specified.
