Exercise Ball

Category: **Sports & Physical Education** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Exercise/Swiss Balls

What it is used for

An exercise ball supports balance, flexibility, and core-strengthening exercises. Select the correct size, inflate it as specified, and use it on a clear, nonslip surface.

How to use

1. Inspect the ball for cuts, leaks, wear, or deformation.
2. Confirm that the ball size and inflation level suit the user and exercise.
3. Place the ball on a flat, nonslip surface away from sharp objects.
4. Sit or position yourself carefully and establish balance before exercising.
5. Perform only suitable exercises with controlled movements and proper posture.
6. Stop immediately if the ball slips, loses air, or causes discomfort.
7. Deflate or store the ball according to the manufacturer's instructions when needed.

⚠ Safety

- Keep the exercise area clear of furniture, sharp edges, and slippery objects.
- Do not exceed the ball's rated load or recommended inflation pressure.
- Use support or supervision for exercises requiring additional balance.
- Do not use a damaged or unstable ball.

Care & storage

- Clean with a compatible mild cleaner and store away from sharp objects and excessive heat.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
