Foam Roller

Category: **Sports & Physical Education** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Foam Roller

What it is used for

A foam roller is used to apply controlled pressure to muscles for warm-up, mobility, and recovery exercises. Select a suitable roller and use slow, comfortable movements.

How to use

1. Inspect the roller for cracks, tears, deformation, or surface damage.
2. Choose a flat, nonslip exercise area with enough space to move.
3. Position the roller under the muscle group being exercised.
4. Support your body with your hands or feet and maintain controlled movement.
5. Roll slowly over the target area without applying excessive pressure to joints.
6. Stop if you experience sharp pain, numbness, or unusual discomfort.
7. Wipe the roller clean after use and return it to storage.

⚠ Safety

- Do not roll directly over joints, bones, or injured areas.
- Avoid excessive pressure and sudden movements.
- Use support if balance is difficult and stop if pain occurs.

Care & storage

- Clean with a compatible mild cleaner and store away from direct sunlight and sharp objects.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
