GSM Cutter

Category: **Sewing, Textile & Handicraft** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: GSM Cutter

What it is used for

A GSM cutter prepares fabric specimens of a specified area for measuring grams per square metre (GSM). Use the correct specimen area and handle the cutting edge carefully.

How to use

1. Inspect the cutter, circular blade, handle, and safety lock for damage.
2. Confirm the required specimen area and compatible cutting mat.
3. Place the fabric flat on the cutting mat without wrinkles or folds.
4. Position the cutter on the fabric according to the manufacturer's instructions.
5. Unlock the cutter and rotate or press it as designed to cut the specimen.
6. Lock the blade and remove the specimen carefully using a suitable tool if needed.
7. Measure the specimen mass with a calibrated balance and calculate GSM using the specified method.

⚠ Safety

- Keep fingers away from the blade and never cut toward your body.
- Use the cutter only on a suitable cutting mat.
- Lock or cover the blade immediately after use.
- Do not use a cutter with a loose or damaged blade.

Care & storage

- Remove fabric fibres, clean the tool, and store it with the blade secured.
