Hand Punch

Category: **Hand Tools - Cutting & Shaping** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Hand punch

What it is used for

A hand punch creates holes or marks in compatible materials using manual pressure. Select the correct punch size and secure the workpiece before use.

How to use

1. Inspect the punch tip, handle, and striking surface for damage.
2. Choose a punch type and size suitable for the material and required hole.
3. Mark the intended position and secure the workpiece on a stable support.
4. Align the punch tip precisely with the mark.
5. Apply controlled pressure or use the specified striking method for the punch type.
6. Check the hole or mark and remove any burrs using an appropriate tool.
7. Clean the punch and return it to storage after use.

⚠ Safety

- Wear eye protection against flying fragments.
- Keep fingers clear of the punch tip and striking area.
- Do not use a mushroomed, cracked, or blunt punch.
- Use a suitable backing surface and never hold small workpieces by hand near the impact point.

Care & storage

- Wipe the punch clean, protect the tip, and store it in a dry tool holder.
