Handcuffs

Category: **Safety & PPE** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Handcuffs

What it is used for

Handcuffs are restraint devices intended for use by trained and legally authorized personnel. Follow applicable law, approved training, and the manufacturer's instructions for safe handling.

How to use

1. Confirm that use is legally authorized and consistent with the applicable procedure.
2. Inspect the cuffs, locking mechanism, hinges, and key for damage.
3. Explain the procedure where appropriate and follow approved training requirements.
4. Apply restraints only as trained, without excessive force or unnecessary delay.
5. Check fit and circulation according to the approved procedure and monitor the restrained person's condition.
6. Use the authorized key or release mechanism when removal is permitted.
7. Inspect and document the equipment's condition after use according to policy.

⚠ Safety

- Never use handcuffs for punishment, intimidation, or unauthorized restraint.
- Do not overtighten; monitor for pain, numbness, swelling, or changes in circulation.
- Seek appropriate medical assistance if injury or distress occurs.
- Keep keys controlled and follow the organization's reporting and storage procedures.

Care & storage

- Clean and inspect the cuffs according to the manufacturer's instructions and store them securely.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
