Heart Rate Monitor

Category: **Beauty, Wellness & Fitness** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Heart Rate Monitor

What it is used for

A heart rate monitor measures pulse rate during exercise or routine fitness monitoring. Fit the sensor correctly and confirm that readings are stable before using them to guide activity.

How to use

1. Inspect the monitor, sensor, strap, and battery or charging status.
2. Read the manufacturer's instructions and choose the correct wearing position.
3. Fit the chest strap or wrist sensor snugly without restricting movement or circulation.
4. Switch on the monitor and wait for a stable heart rate reading.
5. Begin the activity gradually and observe the displayed heart rate during exercise.
6. Record readings as needed and stop if unusual symptoms occur.
7. Clean the sensor and strap after use and store the monitor safely.

⚠ Safety

- Do not rely on the monitor alone to diagnose a medical condition.
- Stop exercising and seek appropriate help for chest pain, faintness, or severe breathlessness.
- Do not wear damaged equipment or overtighten straps.
- Follow medical or exercise-professional advice when monitoring under special conditions.

Care & storage

- Clean the sensor and strap according to instructions and recharge or replace batteries as required.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
