Hole Punch Pliers

Category: **Hand Tools - Cutting & Shaping** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Plier punch

What it is used for

Hole punch pliers create small holes in compatible materials such as leather, fabric, or thin sheet material. Choose the correct punch size and keep the material securely positioned.

How to use

1. Inspect the pliers, punch wheel or tip, hinge, and handles for damage.
2. Select the punch size suitable for the material and required hole diameter.
3. Mark the hole location and position the material between the punch tip and backing surface.
4. Align the punch with the mark and hold the material securely.
5. Squeeze the handles steadily until the punch cuts through the material.
6. Release the handles, remove the material, and inspect the hole edges.
7. Clear scraps from the tool and store it safely.

⚠ Safety

- Keep fingers away from the punch tip and closing jaws.
- Wear eye protection when working with materials that may produce flying fragments.
- Do not punch material that exceeds the tool's rated capacity.
- Do not use pliers with damaged tips or loose hinges.

Care & storage

- Remove scraps, wipe the tool clean, and protect the hinge from corrosion.
