Intercom

Category: **Telecom & Networking** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Intercom

What it is used for

An intercom enables voice communication between rooms, offices, or designated stations. Connect and test the system according to its configuration and operating instructions.

How to use

1. Inspect the intercom units, cables, power supply, and mounting points for damage.
2. Confirm that the stations are connected to the correct ports or network.
3. Switch on the system and check the power or connection indicators.
4. Select the required station or extension using the designated controls.
5. Place a test call and verify microphone, speaker, and audio clarity.
6. Check any supported call, door-release, or alert functions using approved procedures.
7. Finish the test and report faults or abnormal operation.

⚠ Safety

- Use only the specified power supply and compatible connections.
- Keep electrical units away from liquids unless rated for the environment.
- Do not open powered equipment or touch exposed wiring.
- Follow privacy and access-control rules when using intercom features.

Care & storage

- Clean the handset and controls with approved materials and inspect cables periodically.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
