Kettlebell

Category: **Beauty, Wellness & Fitness** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Kettlebells

What it is used for

A kettlebell is used for strength, balance, and conditioning exercises. Select an appropriate weight and maintain controlled technique throughout each movement.

How to use

1. Inspect the kettlebell handle and body for cracks, looseness, or surface damage.
2. Choose a weight suitable for your ability and the planned exercise.
3. Place the kettlebell on a stable, nonslip floor with enough clearance around it.
4. Warm up and review the correct movement technique before lifting.
5. Grip the handle securely and perform the exercise with controlled posture and movement.
6. Return the kettlebell to the floor carefully without dropping or throwing it.
7. Check the equipment and clear the exercise area after use.

⚠ Safety

- Keep feet, hands, and other people clear of the kettlebell's movement path.
- Do not use a damaged kettlebell or a weight beyond your ability.
- Avoid sudden twisting and maintain a stable spine and controlled grip.
- Stop if you experience sharp pain, dizziness, or unusual shortness of breath.

Care & storage

- Wipe the handle and body clean and store the kettlebell in a designated rack.
