Levelling Staff

Category: **Measuring & Marking Tools** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Levelling staff

What it is used for

A levelling staff provides a graduated scale for readings with a level instrument during surveying. Keep the staff vertical and use the correct scale for accurate measurements.

How to use

1. Inspect the staff sections, graduations, locking joints, and base for damage.
2. Extend the staff fully and secure all locking sections.
3. Position the staff at the survey point on firm ground.
4. Hold the staff vertical using its bubble or guidance from the surveyor.
5. Allow the instrument operator to focus and take the reading.
6. Record the reading and move the staff carefully to the next point.
7. Retract the staff, clean it, and store it after surveying.

⚠ Safety

- Keep the staff away from overhead power lines and electrical hazards.
- Do not stand on unstable ground or near unprotected excavation edges.
- Avoid obstructing vehicles, pedestrians, or active work areas.
- Secure extended sections before carrying or moving the staff.

Care & storage

- Wipe off dirt and moisture, protect the graduations, and store the staff in its case.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
