Mixing Tank

Category: **Food Processing & Kitchen** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Syrup mixing tank

What it is used for

A syrup mixing tank combines syrup ingredients into a uniform mixture for suitable food-processing applications. Follow the approved recipe, equipment instructions, and food hygiene requirements.

How to use

1. Inspect the tank, lid, agitator, valves, seals, and control panel for damage.
2. Clean and sanitize all food-contact surfaces according to the approved procedure.
3. Confirm the recipe, ingredient quantities, and batch identification before starting.
4. Add ingredients in the specified order and quantity, following the recipe.
5. Close the lid as required and start the agitator at the recommended speed.
6. Monitor mixing time, temperature, and consistency according to the process instructions.
7. Stop the agitator, transfer the syrup safely, and clean the tank after the batch.

⚠ Safety

- Keep hands, utensils, and loose clothing away from the agitator while it is operating.
- Do not open guards or reach into the tank until the machine is isolated and stopped.
- Use suitable PPE when handling hot syrup or cleaning chemicals.
- Follow food safety and allergen-control procedures for each batch.

Care & storage

- Clean and sanitize the tank after use and inspect seals, valves, and agitator components regularly.
