Mobility Aid

Category: **Medical, Healthcare & First Aid** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Mobility aids for the handicapped person

What it is used for

Mobility aids such as walkers, crutches, and wheelchairs help people move more safely and independently. Select and adjust the aid to the user's needs and follow professional guidance when required.

How to use

1. Inspect the mobility aid for damage, loose joints, worn grips, and faulty brakes.
2. Confirm the aid is appropriate for the user's height, ability, and environment.
3. Adjust handles, supports, or footrests according to manufacturer instructions.
4. Explain safe use and help the user adopt a stable starting position.
5. Support the user during initial movement and check balance and comfort.
6. Use the aid on a suitable, clear surface and avoid obstacles or slippery areas.
7. After use, park or fold the aid as instructed and report any faults.

⚠ Safety

- Do not use an unstable, damaged, or incorrectly adjusted mobility aid.
- Use assistance when transferring or walking if the user needs support.
- Lock wheelchair brakes before transfers and keep feet clear of wheels.
- Follow clinician guidance for weight-bearing restrictions and safe movement.

Care & storage

- Clean contact surfaces regularly and inspect grips, wheels, tips, and brakes before use.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
