Nail Punch

Category: **Hand Tools - Striking & Digging** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Nail Punch

What it is used for

A nail punch drives a nail head slightly below a surface or helps position small nails during woodworking. Select the correct punch size and strike it with a suitable hammer under control.

How to use

1. Inspect the punch tip and body for mushrooming, cracks, or deformation.
2. Select a punch that fits the nail head appropriately.
3. Secure the workpiece on a stable work surface.
4. Position the punch tip squarely on the nail head.
5. Hold the punch securely and strike it carefully with a suitable hammer.
6. Check the nail depth and repeat gently if required.
7. Store the punch safely after use.

⚠ Safety

- Wear safety glasses to protect against flying metal fragments.
- Keep fingers clear of the hammer striking area.
- Do not use a cracked or mushroomed punch.
- Strike with controlled force and keep the workpiece stable.

Care & storage

- Wipe the punch clean and store it dry to prevent corrosion.
