Oxygen Cylinder Trolley

Category: **Medical, Healthcare & First Aid** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Oxygen Cylinder Trolley

What it is used for

An oxygen cylinder trolley supports the safe movement of oxygen cylinders between approved locations. Secure the cylinder properly and follow medical gas handling procedures at all times.

How to use

1. Inspect the trolley frame, wheels, handle, straps, and restraints for damage.
2. Confirm that the trolley is suitable for the cylinder size and load.
3. Keep the cylinder valve closed and the protective cap fitted when required for transport.
4. Position the cylinder securely in the trolley and fasten the approved restraint.
5. Move the trolley slowly using the handle, avoiding obstacles and uneven surfaces.
6. Park the trolley on stable ground and secure the cylinder against tipping.
7. Report damaged restraints, wheels, or other defects before further use.

⚠ Safety

- Never drag, roll, or lift a cylinder by its valve or regulator.
- Keep oxygen cylinders away from oil, grease, flames, and ignition sources.
- Do not use the trolley if the cylinder cannot be secured properly.
- Follow facility procedures for oxygen cylinder transport and storage.

Care & storage

- Keep the trolley clean and dry and inspect wheels, restraints, and frame regularly.
