Patient Call Bell

Category: **Medical, Healthcare & First Aid** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Patient Remote Bell

What it is used for

A patient call bell allows a patient to request assistance from nursing or support staff. Install and test the call system so that alerts are clearly received at the designated station.

How to use

1. Inspect the call bell, remote, cable, connector, and indicator for damage.
2. Confirm that the unit is connected to the correct patient station or call system.
3. Position the call button within easy reach of the patient.
4. Power the system according to the manufacturer's instructions and check its status indicator.
5. Press the call button and verify that the alert appears at the designated receiving station.
6. Reset or cancel the alert using the approved procedure and confirm normal status.
7. Report faults and ensure the patient can reach the working call button.

⚠ Safety

- Never disconnect or disable a patient call bell without authorization and an alternative support plan.
- Keep cables arranged to prevent tripping or entanglement.
- Do not use damaged electrical components near patients.
- Follow facility procedures for urgent patient assistance.

Care & storage

- Clean the button and remote with approved disinfectant and inspect cables regularly.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
