Plastic Wrap Dispenser

Category: **Food Processing & Kitchen** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Plastic Wrap Dispenser

What it is used for

A plastic wrap dispenser holds and cuts food-grade plastic film for covering suitable food containers or work items. Load the correct film roll and use the cutting edge carefully to prevent injury and contamination.

How to use

1. Inspect the dispenser body, roll holder, cutting edge, and cover for damage.
2. Confirm that the plastic wrap is suitable for the intended food-contact use.
3. Fit the roll according to the dispenser design and keep it aligned.
4. Pull out the required length of film without touching food-contact surfaces unnecessarily.
5. Wrap the item securely and avoid excessive film contact with unsuitable hot surfaces.
6. Cut the film using the designated cutter while keeping fingers away from the edge.
7. Return the film end to the holder and clean the dispenser as needed.

⚠ Safety

- Keep fingers clear of the cutting edge and moving parts.
- Do not use damaged film or wrap that is not approved for food contact.
- Keep the dispenser away from open flames and hot equipment.
- Follow the film manufacturer's temperature and microwave-use restrictions.

Care & storage

- Remove film residue, clean the dispenser according to its material, and replace damaged cutting parts.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
