Rescue Hook

Category: **Safety & PPE** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Safety rescue hook

What it is used for

A safety rescue hook helps trained responders move or separate a person or object from a hazard while maintaining distance. Use it only for approved rescue situations and follow the site's emergency procedure.

How to use

1. Inspect the hook, shaft, handle, insulation, and attachments for damage.
2. Confirm that the hook is rated for the intended rescue hazard and application.
3. Assess the scene from a safe position and alert the emergency response team.
4. Wear required protective equipment and maintain a clear escape route.
5. Use the hook only from a safe position and follow trained rescue procedures.
6. Move the affected person or object only when the action is safe and authorized.
7. After use, isolate the equipment if needed, inspect it, and report any damage.

⚠ Safety

- Do not use a rescue hook near live electrical hazards unless it is specifically rated and trained procedures permit it.
- Never enter an unsafe scene without proper authorization and protection.
- Do not use the hook as a lifting device unless designed and rated for lifting.
- Call emergency services and follow the site's rescue plan.

Care & storage

- Clean and inspect the hook after use and store it in its designated emergency location.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
