Satellite Phone

Category: **Telecom & Networking** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Satellite phones for areas with limited cell service

What it is used for

A satellite phone provides voice or messaging communication in areas with limited cellular coverage. Check service availability, antenna positioning, and emergency communication procedures before use.

How to use

1. Inspect the phone, battery, charger, antenna, and accessories for damage.
2. Charge the battery and activate the service according to provider instructions.
3. Move to an open area with a clear view of the sky.
4. Extend or position the antenna as specified by the manufacturer.
5. Wait for satellite registration and confirm signal availability.
6. Make a test call or send a permitted test message.
7. End the connection, power off if required, and store the phone securely.

⚠ Safety

- Use only approved batteries, chargers, and accessories.
- Keep the antenna clear of obstructions during communication.
- Follow local laws and service restrictions for satellite phone use.
- Do not rely on the phone alone when an emergency backup plan is required.

Care & storage

- Keep the phone dry, charge the battery as recommended, and protect the antenna from damage.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
