Seed Counter

Category: **Agriculture & Gardening** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Seed counters

What it is used for

A seed counter helps count seeds accurately for sowing, sampling, and laboratory work. Select the correct counting method and keep seeds clean and properly identified.

How to use

1. Inspect the seed counter, tray, sensors, and display for damage or contamination.
2. Confirm that the counter supports the seed size and type being tested.
3. Clean the counting surface and prepare a labelled seed sample.
4. Set the required count or operating mode according to the manual.
5. Feed seeds evenly into the counter without overloading the mechanism.
6. Record the displayed count and compare it with the sample requirement.
7. Clear remaining seeds and clean the equipment after counting.

⚠ Safety

- Keep fingers away from moving parts and feed mechanisms.
- Use dry, clean seeds unless the instrument supports other sample conditions.
- Disconnect power before cleaning powered equipment.
- Do not exceed the instrument's specified capacity.

Care & storage

- Remove seed debris after use and store the counter in a clean, dry place.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
