Studio Lighting Kit

Category: **Audio-Visual, Camera & Media** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Lighting Equipment kit

What it is used for

A studio lighting kit provides controlled illumination for photography, video recording, or presentations. Set up lights securely and adjust brightness and direction to suit the subject and recording environment.

How to use

1. Inspect lights, stands, power cables, connectors, modifiers, and mounting points.
2. Choose a stable location and position stands away from walkways.
3. Extend each stand carefully and secure its locks before mounting the light.
4. Attach the light and modifier using the supplied fittings.
5. Connect power safely and arrange cables to prevent tripping.
6. Switch on the lights and adjust brightness, angle, and diffusion as required.
7. Switch off and unplug equipment before dismantling and storing it.

⚠ Safety

- Use stands rated for the light's weight and secure them against tipping.
- Keep hot lights and ventilation openings clear of fabrics and other combustible materials.
- Do not use damaged cables or connectors.
- Protect electrical equipment from liquids and use appropriate power supplies.

Care & storage

- Allow hot fixtures to cool before packing and store cables loosely without sharp bends.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
