Thread Stand

Category: **Sewing, Textile & Handicraft** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Cone Thread Holder

What it is used for

A cone thread stand holds thread cones and guides thread smoothly to a sewing machine. Position the stand securely and ensure the thread path remains unobstructed during sewing.

How to use

1. Inspect the stand base, spindle, guide eyelets, and thread path for damage.
2. Place the stand on a stable surface behind or beside the sewing machine as designed.
3. Fit the thread cone securely onto the spindle.
4. Route the thread through the guide eyelets in the specified order.
5. Pull the thread gently to check that the cone rotates freely without snagging.
6. Thread the sewing machine according to its instructions and test on scrap fabric.
7. Remove loose thread and store the stand safely after use.

⚠ Safety

- Keep the stand clear of moving machine parts and walkways.
- Do not use a cracked base or bent spindle.
- Avoid pulling thread forcefully or allowing it to wrap around moving components.
- Switch off the sewing machine before correcting a jammed thread path.

Care & storage

- Remove lint and thread debris regularly and store the stand in a dry place.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
