Tofu Press

Category: **Food Processing & Kitchen** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Tofu hand press

What it is used for

A tofu hand press removes excess liquid from tofu to achieve the required firmness and texture. Use clean food-contact surfaces and apply pressure gradually according to the tofu and press instructions.

How to use

1. Inspect the press frame, plates, screws, drainage tray, and handles for damage.
2. Clean and sanitize all food-contact parts before use.
3. Place the tofu block inside the press using a clean container or liner if required.
4. Position the top plate evenly and ensure the press is stable.
5. Tighten the screw or apply pressure gradually according to the product instructions.
6. Allow liquid to drain into the designated tray and monitor the pressing process.
7. Release pressure safely, remove the tofu, and clean the press after use.

⚠ Safety

- Keep fingers clear of moving plates and screw mechanisms.
- Do not exceed the press's rated capacity or apply sudden excessive force.
- Use clean food-grade materials and prevent cross-contamination.
- Release pressure fully before disassembling or cleaning the press.

Care & storage

- Wash, sanitize, and dry all components after use and inspect the screw mechanism regularly.
