Tripod

Category: **Audio-Visual, Camera & Media** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Tripod

What it is used for

A tripod supports a camera, lighting device, or other compatible equipment for stable positioning. Adjust its legs and head securely before mounting equipment and confirm that the setup remains balanced.

How to use

1. Inspect the tripod legs, locks, feet, head, and mounting plate for damage.
2. Choose a level surface with enough space for all tripod legs.
3. Spread the legs fully and lock each leg section securely.
4. Adjust the height and level the tripod head as required.
5. Attach compatible equipment to the mounting plate and tighten the lock.
6. Check stability and frame the shot or position the equipment as needed.
7. Remove the equipment before folding the tripod for storage.

⚠ Safety

- Do not exceed the tripod's rated load.
- Keep legs clear of walkways and secure the setup against accidental tipping.
- Never loosen mounting locks while equipment is unsupported.
- Use extra caution outdoors in wind or on uneven ground.

Care & storage

- Wipe the legs and head clean, dry them, and store the tripod folded in a protective bag.
