VR Headset

Category: **Audio-Visual, Camera & Media** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: VR Standalone Headset

What it is used for

A standalone VR headset provides immersive virtual experiences for learning, simulation, and demonstrations. Check the device fit, play area, and software settings before starting a session.

How to use

1. Inspect the headset, lenses, straps, controllers, and charging cable for damage.
2. Charge the headset and install approved software or updates as required.
3. Adjust the head strap and lens position for a comfortable, clear view.
4. Set up the designated play area and remove obstacles from the user's movement space.
5. Complete the headset's boundary setup and explain controller functions before use.
6. Start the approved application and supervise the user during the session.
7. Exit the application, clean contact surfaces, and store the headset safely.

⚠ Safety

- Do not use a damaged headset or charging cable.
- Keep users away from stairs, sharp objects, and other physical hazards.
- Stop the session if dizziness, nausea, eye strain, or disorientation occurs.
- Follow age guidance, session limits, and hygiene procedures for shared devices.

Care & storage

- Clean lenses with a suitable microfiber cloth and sanitize shared contact surfaces as directed by the manufacturer.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
