Vaccinator

Category: **Animal Husbandry & Dairy** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Automatic Vaccinator

What it is used for

An automatic vaccinator delivers a measured vaccine dose for approved animal vaccination procedures. Use only the prescribed vaccine, confirm the device setting, and follow veterinary guidance and vaccine handling requirements.

How to use

1. Verify the animal species, vaccine identity, expiry date, storage condition, and prescribed dose.
2. Inspect the vaccinator, needle, dose setting, seals, and connections for damage or contamination.
3. Perform hand hygiene and wear appropriate protective equipment.
4. Prepare the vaccine according to its label and load the device using the approved method.
5. Set and verify the prescribed dose before administering the vaccine at the approved site and route.
6. Monitor the animal after vaccination and record the vaccine details, dose, date, and animal identification.
7. Dispose of used needles safely and clean or disinfect reusable parts according to instructions.

⚠ Safety

- Vaccines must be administered under veterinary direction and according to label instructions.
- Never use contaminated, expired, or improperly stored vaccine.
- Do not recap used needles by hand; use an approved sharps container.
- Stop use if the device leaks, misdoses, or malfunctions.

Care & storage

- Clean and maintain the vaccinator as instructed and store vaccines within their required temperature range.
