Vehicle Dashboard

Category: **Automotive** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Dashboard with indicators

What it is used for

A vehicle dashboard with indicators demonstrates driver controls, warning lights, and instrument displays. Use the dashboard for supervised learning and verify indicator meanings against the vehicle manual.

How to use

1. Inspect the dashboard, switches, display, indicator lamps, and connectors for visible damage.
2. Confirm the vehicle or training panel is secured and the operating area is safe.
3. Identify the major instruments, switches, and warning indicators using the owner's manual.
4. Switch on the ignition or training power as appropriate and observe the indicator self-check.
5. Demonstrate selected controls and explain the meaning of relevant warning lights.
6. Switch off power after the demonstration and report any abnormal indicator or fault.
7. Return the dashboard or training equipment to its designated storage or parked condition.

⚠ Safety

- Do not ignore warning indicators on a real vehicle; follow the owner's manual.
- Keep hands clear of moving vehicle parts and avoid distraction during live vehicle operation.
- Do not bypass dashboard safety warnings or electrical protections.
- Use a qualified technician for electrical faults or unexpected warning lights.

Care & storage

- Clean dashboard surfaces with a suitable non-abrasive cleaner and protect electrical connectors from moisture.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
