Video Camera

Category: **Audio-Visual, Camera & Media** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Handy Camera, Microphone / voice system for lecture and class activities

What it is used for

A video camera with a microphone or voice system records lectures, demonstrations, and classroom activities. Set up the camera and audio equipment before recording, and verify image and sound quality with a test.

How to use

1. Inspect the camera, lens, battery, memory card, microphone, and audio cables.
2. Charge the battery and confirm sufficient recording space is available.
3. Mount the camera securely on a stable tripod or designated support.
4. Connect the microphone or voice system and check compatible input settings.
5. Frame the subject, adjust focus and exposure, and test the audio level.
6. Record a short test clip and verify picture clarity and sound quality.
7. Start recording, monitor the recording status, and safely stop and save the file afterward.

⚠ Safety

- Keep cables away from walkways and secure the camera against tipping.
- Do not operate damaged batteries, chargers, or cables.
- Obtain required permission before recording people or classroom activities.
- Avoid recording private or confidential information without authorization.

Care & storage

- Clean the lens with suitable materials, recharge batteries safely, and store equipment in a padded case.
