Voice Recorder

Category: **Audio-Visual, Camera & Media** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Voice recorder

What it is used for

A voice recorder captures spoken audio for lectures, interviews, meetings, and training activities. Check storage, battery level, microphone placement, and recording settings before capturing audio.

How to use

1. Inspect the recorder, built-in microphone, external microphone jack, buttons, and battery compartment.
2. Charge or install the approved batteries and confirm sufficient storage space.
3. Select the required recording format, quality, and input source.
4. Place the recorder near the speaker on a stable surface, away from unwanted noise.
5. Make a short test recording and play it back to verify sound quality.
6. Record the session while checking the recording indicator and remaining storage.
7. Stop recording, save the file, and transfer or back it up as authorized.

⚠ Safety

- Do not record confidential conversations without proper authorization.
- Keep the recorder and cables away from liquids and excessive heat.
- Avoid blocking the microphone or handling the device noisily during recording.
- Use only compatible batteries and approved charging equipment.

Care & storage

- Clean the microphone openings gently and store the recorder in a dry, protective case.
