Warning Light

Category: **Safety & PPE** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Emergency Warning Lights

What it is used for

Emergency warning lights alert people to hazards, restricted areas, or emergency situations. Place and operate the light according to the site emergency plan and ensure it remains visible to approaching people.

How to use

1. Inspect the warning light, lens, casing, switch, battery, and power cable for damage.
2. Confirm the light type and power requirements are suitable for the intended location.
3. Choose a visible, stable position away from traffic obstruction and other hazards.
4. Secure the light and aim it toward the intended approach or warning area.
5. Switch on the light and verify that the signal is clearly visible.
6. Monitor the warning light during the emergency or restricted activity.
7. Switch off, collect, inspect, and store the light after the area is safe.

⚠ Safety

- Do not use damaged lights, batteries, or power cables.
- Do not place warning lights where they create a trip hazard or block emergency access.
- Use approved traffic-control procedures when warning people near vehicle routes.
- Do not rely on a warning light as the only emergency safeguard.

Care & storage

- Recharge or replace batteries as required and test the light periodically according to site procedures.
