Washing Tank

Category: **Food Processing & Kitchen** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Washing and Soaking Tanks

What it is used for

Washing and soaking tanks are used to clean, rinse, or soak food ingredients before processing. Follow the approved food-handling procedure and maintain hygienic water and tank conditions.

How to use

1. Inspect the tank, drain, taps, and surfaces for damage or residue.
2. Clean and sanitize food-contact surfaces before use.
3. Confirm the tank is suitable for the ingredient and intended process.
4. Fill with the required quantity and quality of water.
5. Add ingredients carefully and follow the specified soaking or washing time.
6. Drain the water safely and remove ingredients using clean utensils.
7. Clean, sanitize, and dry the tank after use.

⚠ Safety

- Use potable water for food washing and soaking.
- Avoid mixing raw and ready-to-eat ingredients in the same tank without proper cleaning.
- Do not use tanks with cracks, corrosion, or chemical contamination.
- Keep floors dry where possible to prevent slips.

Care & storage

- Clean drains regularly and inspect the tank for residue, leaks, or corrosion.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
