Whistle

Category: **Sports & Physical Education** Type: **Short SOP** Priority: **Medium** 1 labs

Covers these lab items: Whistle

What it is used for

A whistle produces an audible signal for instructions, timing, or emergency communication during sports and physical activities. Use clear, controlled signals and follow the activity's established whistle codes.

How to use

1. Inspect the whistle for cracks, blockage, or damage to its attachment.
2. Clean the mouthpiece before use, especially when the whistle is shared.
3. Attach the whistle securely to a lanyard or designated holder.
4. Confirm the signal pattern with participants before the activity begins.
5. Blow short, clear signals appropriate to the instruction or emergency.
6. Check that participants can hear the signal and respond correctly.
7. Clean and store the whistle after the activity.

⚠ Safety

- Avoid prolonged or excessively loud blowing close to people's ears.
- Do not share mouth-contact equipment without appropriate cleaning.
- Keep the lanyard clear of machinery and other entanglement hazards.
- Use emergency signals consistently and according to the site's procedures.

Care & storage

- Clean the mouthpiece after use and store the whistle in a clean, dry place.
