Welding Apron

Category: **Safety & PPE** Type: **Handling note** Priority: **Medium** 2 labs

Covers these lab items: Welding Apron

What it is used for

A welding apron protects the torso and clothing from sparks, spatter, and heat during suitable welding tasks.

How to handle

- Inspect the apron for holes, tears, damaged fasteners, and worn protective material.
- Select an apron suitable for the welding process and associated heat and spatter hazards.
- Wear it securely over suitable work clothing with other required welding PPE.
- Replace the apron if damage compromises protection or contamination makes it unsafe.

Storage

- Store clean and dry away from flames, chemicals, sharp tools, and excessive heat.
- Keep it hanging or folded without damaging protective layers.
