Mop

Category: **Hospitality & Housekeeping** Type: **Short SOP** Priority: **Low** 28 labs

Covers these lab items: Mop; Mop (Indian/Western); Mops

What it is used for

A mop cleans floors by removing dust, spills, and surface dirt using water or an approved cleaning solution. Select the correct mop type for the floor and follow the site's cleaning and hygiene procedure.

How to use

1. Inspect the mop head, handle, and wringer or bucket for damage.
2. Choose a mop suitable for the floor type and cleaning task.
3. Place warning signs around the work area and prepare the approved cleaning solution.
4. Dip the mop into the solution and wring out excess liquid as appropriate.
5. Clean the floor in controlled sections, moving dirt toward the collection area.
6. Rinse or replace the mop head when dirty and change solution when required.
7. Allow the floor to dry, clean the equipment, and store it properly.

⚠ Safety

- Use wet-floor signs to prevent slips and falls.
- Wear gloves when handling cleaning chemicals and follow label instructions.
- Never mix cleaning chemicals unless the product instructions explicitly allow it.
- Keep dirty mop water away from food preparation and clean surfaces.

Care & storage

- Wash and dry reusable mop heads thoroughly and store them in a ventilated area.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
