Dress Form

Category: **Sewing, Textile & Handicraft** Type: **Short SOP** Priority: **Low** 7 labs

Covers these lab items: Dress Model; Full Body Mannequin – Basic; Mannequin; Mannequin (Male or female, Size M); Mannequins; Sewing Mannequin

What it is used for

A dress form or mannequin provides a body-shaped support for garment fitting, draping, pattern development, and sewing demonstrations. Adjust the form to the required size and secure it before pinning or fitting fabric.

How to use

1. Inspect the dress form, stand, adjustment controls, and base for damage.
2. Place the mannequin on a stable, level surface with adequate working space.
3. Adjust height and body measurements according to the required design or size.
4. Lock all adjustment points and check that the form is stable.
5. Drape fabric or position the garment on the form and align key seams and markings.
6. Use pins carefully to secure fabric and check fit from multiple angles.
7. Remove pins and garments safely, then return the form to its storage position.

⚠ Safety

- Do not use an unstable stand or damaged adjustment mechanism.
- Keep fingers clear of sharp pins and remove pins after the task.
- Do not lean heavily on the mannequin or exceed its designed load.
- Keep the working area clear to prevent trips and falls.

Care & storage

- Wipe the form with a suitable cloth and store it away from moisture and direct heat.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
