Mortar Pan

Category: **Construction & Masonry** Type: **Short SOP** Priority: **Low** 5 labs

Covers these lab items: Ghamelas (MS Steel) (for construction work); Mortar pan; Plastic Ghamale

What it is used for

A mortar pan or ghamela carries mortar, sand, cement, and other construction materials around the worksite. Select a suitable pan, load it within a safe limit, and handle it without spilling materials.

How to use

1. Inspect the pan for cracks, sharp edges, corrosion, or damaged handles.
2. Choose a metal or plastic pan suitable for the material and task.
3. Place the pan on stable ground before filling it.
4. Load the material evenly without exceeding a manageable weight.
5. Grip the handles securely and carry the pan using a safe posture.
6. Empty the material at the designated location without sudden tipping toward others.
7. Remove residue, clean the pan, and store it safely.

⚠ Safety

- Wear gloves, safety footwear, and other required PPE.
- Do not overload the pan or lift beyond your capability.
- Avoid carrying materials through obstructed or slippery paths.
- Keep hands away from sharp edges and damaged handles.

Care & storage

- Clean off cement or mortar before it hardens and store the pan in a dry area.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
