Milk Strainer

Category: **Animal Husbandry & Dairy** Type: **Short SOP** Priority: **Low** 4 labs

Covers these lab items: Milk strainer

What it is used for

A milk strainer removes visible particles from milk during hygienic collection and handling. Use a clean, food-grade strainer and follow the dairy's approved filtration and milk storage procedure.

How to use

1. Inspect the strainer body, mesh, handle, and joints for damage or residue.
2. Wash and sanitize the strainer before use.
3. Place it securely over a clean, suitable milk collection vessel.
4. Pour milk slowly through the mesh without splashing or overflowing.
5. Check the filtered milk and remove accumulated residue safely.
6. Transfer the milk to the required storage container and maintain the specified temperature.
7. Clean, sanitize, and dry the strainer immediately after use.

⚠ Safety

- Do not use torn mesh, rusted parts, or contaminated strainers.
- Prevent hands and non-food objects from contacting the milk or strainer interior.
- Do not treat straining as a substitute for pasteurization or other required milk safety controls.
- Handle hot sanitizing water and cleaning chemicals carefully.

Care & storage

- Clean mesh openings thoroughly and store the strainer in a dry, hygienic location.
