Grooming Brush

Category: **Animal Husbandry & Dairy** Type: **Short SOP** Priority: **Low** 3 labs

Covers these lab items: Grooming brush

What it is used for

A grooming brush removes loose hair, dirt, and debris from an animal's coat while supporting routine coat care. Select a brush suitable for the species, coat type, and animal's condition.

How to use

1. Inspect the brush bristles, handle, and body for damage or sharp edges.
2. Choose a brush suitable for the animal's coat and grooming needs.
3. Secure the animal calmly using approved handling methods.
4. Brush gently in the direction of hair growth, avoiding sensitive areas.
5. Check the coat and skin for wounds, irritation, parasites, or unusual changes.
6. Remove collected hair and debris from the brush after grooming.
7. Clean and store the brush separately from equipment used for other animals when required.

⚠ Safety

- Use trained animal-handling practices and avoid sudden movements that may startle the animal.
- Do not brush over open wounds or severely irritated skin without veterinary guidance.
- Keep fingers away from sharp or broken bristles.
- Use separate or disinfected brushes to reduce disease transmission between animals.

Care & storage

- Remove hair after each use and clean or disinfect the brush according to the animal-care procedure.
