Muzzle

Category: **Animal Husbandry & Dairy** Type: **Short SOP** Priority: **Low** 3 labs

Covers these lab items: Muzzle

What it is used for

An animal muzzle helps reduce biting or unwanted feeding during approved handling and veterinary care. Select a properly fitted muzzle for the species and use it only when necessary under appropriate supervision.

How to use

1. Confirm that the muzzle type is suitable for the animal's species, size, and intended purpose.
2. Inspect straps, fasteners, and material for damage or wear.
3. Introduce the muzzle calmly and allow the animal to become accustomed to it when possible.
4. Fit the muzzle according to manufacturer or veterinary instructions without excessive tightness.
5. Check that breathing remains unobstructed and monitor the animal continuously.
6. Remove the muzzle promptly when the supervised task is complete or distress occurs.
7. Clean and store the muzzle after use.

⚠ Safety

- Use a muzzle only under appropriate supervision and for a limited duration.
- Never obstruct breathing, panting, vomiting, or essential cooling functions.
- Do not leave a muzzled animal unattended or use a muzzle on an unsuitable animal without expert guidance.
- Stop immediately if the animal shows breathing difficulty or severe distress.

Care & storage

- Clean and disinfect the muzzle as appropriate and inspect straps before each use.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
