Pastry Brush

Category: **Food Processing & Kitchen** Type: **Short SOP** Priority: **Low** 1 labs

Covers these lab items: Pastry Brushes

What it is used for

A pastry brush spreads egg wash, butter, glaze, oil, or other suitable coatings evenly over food. Select a food-safe brush and clean it thoroughly to prevent contamination between ingredients.

How to use

1. Inspect the bristles, handle, and brush head for damage or loose parts.
2. Choose a food-safe brush suitable for the ingredient and temperature.
3. Wash the brush before use and ensure it is free of residue.
4. Dip the bristles into the coating and remove excess liquid to prevent dripping.
5. Brush the food gently and evenly without damaging the surface.
6. Keep separate brushes for ingredients that may cause cross-contamination when required.
7. Wash, sanitize, and dry the brush after use.

⚠ Safety

- Do not use brushes with loose bristles or damaged handles.
- Keep food-contact brushes separate from paint or cleaning brushes.
- Use heat-resistant brushes only within their rated temperature range.
- Follow food hygiene procedures when handling allergens and raw egg mixtures.

Care & storage

- Clean promptly after use, dry thoroughly, and store in a clean, covered location.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
