Soldering Flux

Category: **Welding & Soldering** Type: **Handling note** Priority: **Low** 10 labs

Covers these lab items: Flux; Soldering Flux

What it is used for

Soldering flux removes or reduces surface oxides to support solder wetting and reliable electrical or metal joints.

How to handle

- Identify the flux type and confirm compatibility with the solder, materials, and process.
- Read the label and Safety Data Sheet; wear suitable eye protection and gloves as required.
- Use adequate fume extraction and avoid inhaling vapours or contacting skin and eyes.
- Apply only the required amount and clean residues according to the flux manufacturer's instructions.

Storage

- Keep flux in its original labelled, tightly closed container.
- Store under specified temperature conditions away from heat and incompatible chemicals.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
