Faucet

Category: **Plumbing & Pipe Fitting** Type: **Handling note** Priority: **Low** 4 labs

Covers these lab items: Taps/faucets

What it is used for

Faucets control water flow in sinks, wash basins, and plumbing fixtures.

How to handle

- Inspect the faucet body, handle, aerator, and connections for leaks or damage.
- Operate handles gently and avoid forcing stiff controls.
- Keep the outlet clean and prevent contact with contaminated materials.
- Report persistent dripping, low flow, or loose fittings for repair.
- Use suitable tools and isolate the water supply before maintenance.

Storage

- Store replacement faucets and fittings in clean, dry packaging.
- Keep seals and small components together in labelled containers.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
