Sample Bag

Category: **Agriculture & Gardening** Type: **Handling note** Priority: **Low** 3 labs

Covers these lab items: Sample bags-polythene and cloth

What it is used for

Sample bags collect and transport soil, plant, seed, or other field samples for identification or analysis.

How to handle

- Choose a clean bag made from suitable polythene or cloth for the sample type.
- Label each bag with sample ID, collection location, date, and other required details.
- Use clean tools and avoid mixing samples or contaminating the bag interior.
- Seal bags appropriately and follow any required ventilation, moisture, or temperature conditions.
- Handle potentially contaminated samples with suitable PPE and follow the relevant collection procedure.

Storage

- Keep samples in their specified conditions and separate incompatible sample types.
- Store empty bags clean and dry in a protected area.
