Welding Cable

Category: **Welding & Soldering** Type: **Handling note** Priority: **Low** 2 labs

Covers these lab items: Cable & Lugs (Welding cable)

What it is used for

Handle welding cables and lugs safely to maintain electrical continuity and prevent burns or shock.

How to handle

- Inspect cable insulation, connectors, and lugs for wear, looseness, or overheating before use.
- Use cables with the correct current rating and compatible welding equipment.
- Switch off the welding power source before fitting or removing connections.
- Keep cables away from hot metal, sharp edges, water, and vehicle or foot traffic.

Storage

- Coil cables loosely after they have cooled and are safe to handle.
- Store in a dry, ventilated place away from oils, chemicals, and sharp tools.
