LED Light

Category: **Electrical & Electronic Components & Kits** Type: **Handling note** Priority: **Low** 1 labs

Covers these lab items: LED Tube Lights (Industrial Area)

What it is used for

Handle LED tube lights safely during inspection, installation, and replacement.

How to handle

- Switch off and isolate the electrical supply before installation or removal.
- Verify tube type, voltage rating, and fixture compatibility before fitting.
- Use a stable ladder or approved access equipment and suitable PPE.
- Do not install cracked tubes or touch exposed electrical contacts.

Storage

- Keep replacement tubes in their protective packaging until needed.
- Store horizontally or as directed by the manufacturer in a dry, secure area.

Disclaimer: This SOP is prepared from general information available on the internet. For detailed instructions, refer to the manufacturer's original manual / file.
